Andrew,

Thank you for the quick reply. We will work on finishing the aggregate report ASAP. To follow up with the questions:

1) I will talk with Mike to see the best way to report the groups clearly, but we can definitely identify phase I vs phase II on a combined report.
2) Yes, I would be happy to do a presentation at the January meeting!

Thanks again!
Sincerely,
Megan

Subject: RE: NPM reports for January Meeting

Meghan,

Thanks so much for this information. Please get the aggregate data to me and Debbie ASAP. I believe the cut-off for the receipt of reports is 12/29. And yes, please do call attention to the differences between the quarterly and aggregate data findings during this discussion at the January Board meeting.

To answer your questions:
1) I think it would be acceptable to combine the reports. I do think that you should somehow consistently identify, throughout your report, which sites are phase 1 and which sites are phase 2.

2) I agree, I believe that a 15 minute presentation to the Board regarding the NPM would be most beneficial. Please keep in mind that our March Board meeting is scheduled to be held in Iowa City. Would it be possible for you to present at our January meeting?

Thanks, Megan, and Happy Holidays!

Subject: NPM reports for January Meeting

Hello Andrew,

Please see the attached quarterly reports for Phase I and Phase II as well as an updated application for the Target/CVS site in Cedar Rapids. Mike and I are working on compiling the final aggregate data for the final phase I report. We will have that to you next week and I apologize for the delay. During my discussion with the Board in January, I would be happy to call attention to the differences between our quarterly and aggregate data findings thus far.

Also, I have a couple of questions:

1) Would it be acceptable to combine Phase I and Phase II sites starting with the next report? Because of the way we renewed Phase I sites, the phases will be aligned after this month. I think it may be beneficial to the board to see all sites combined as one report. Of course would still provide individual data for all sites.
2) With new members joining the board, would it be beneficial to do a brief presentation on the NPM pilot? Perhaps 15 min at the March meeting? We could include some background/context for the pilot as well as have Mike interpret the results to this point. Anthony and I believe this would be useful to ensure the Board's opinions are part of the discussion of this pilot project moving forward.

Thank you and Happy Holidays!

Megan
