# ARNPs

## WHERE DO WE LIVE & WORK?

### COUNTY OF RESIDENCE

Concentration of active ARNPs by county of residence. Indicated by color of county, as defined in the legend at right.

### COUNTY OF EMPLOYMENT

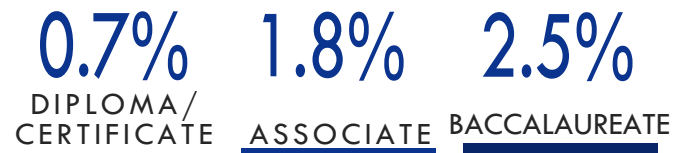

\*Concentration of active ARNPs by county of employment. Indicated by graduated symbols, at right.

\*Louisia, Osceola, Taylor and Worth counties do not have an ARNP employed within the county.

## WHAT IS OUR EDUCATION? HIGHEST DEGREE EARNED

INDIVIDUALS WITH THESE DEGREE LEVELS WERE GRANDFATHERED IN PRIOR TO CURRENT RULES (A TOTAL OF 165 NURSES)

95% OF ARNPs IN IOWA HAVE A MASTER'S OR DOCTORAL DEGREE

## SAFETY AND EFFICACY OF ARNPs

Source: Unless otherwise noted data provided by the Iowa Board of Nursing, 7/1/2019

Through their BSN and graduate education, Advanced Registered Nurse Practitioners (ARNPs) are prepared to provide safe, effective and quality care to the public. The Institute of Medicine report that examined decades of research on ARNP practice—The Future of Nursing: Leading Change, Advancing Health—recommended that states remove barriers to full scope of practice for advanced practice nurses (IOM, 2011). The National Governor's Association (NGA) conducted a comprehensive review of the literature to determine the effect of scope of practice changes on health care access and quality. The results of the NGA review confirmed that ARNPs provide high quality care and evidence that ARNPs can improve access to care (Schiff, 2012; Sox, 1979). Furthermore, the VA Evidence-based Synthesis Program depicted similar results on health outcomes and quality of life among the four ARNP roles (McCleery et al., 2014).
