Iowa Board of Nursing Offers New Alternative to Discipline Program

Rhonda Ruby, MS, RN

What Is Offered

A new program is currently being implemented by the Iowa Board of Nursing. The Iowa Nurse Assistance Program (INAP) is a confidential monitoring program for nurses who are impaired as a result of alcohol or drug use or by any mental or physical condition. It is a voluntary program that provides an opportunity for licensed professionals to receive proper treatment and maintain their professional status while protecting the safety of the public.

What INAP Accomplishes

INAP is an alternative to discipline program that is aimed at assuring safe nursing care in Iowa. This program is known as an alternative program because nurses are directed into treatment and early monitoring rather than to the disciplinary process (Darbo, 2011). INAP can help quickly remove someone from practice and provide a path to treatment. With proper monitoring this program may prevent harm to the public, and once the nurse is determined to be safe to practice may also help retain nurses in the workforce.

The Iowa Nurse Assistance Program Can Help

Why INAP Was Established

Health care professionals have unique workplace risk factors that may increase their chance for the development of a substance use disorder. These can include medication access, workplace stress, and even a belief they should be able to handle it. Although the rates of substance use disorders in the nursing profession are no higher than those of the general population (National Council of State Boards of Nursing, 2011), it does present complex challenges. This program helps to create an environment that encourages nurses to self-report impairment issues and promote public protection.

Why Programs like INAP Work

Research demonstrates that treatment for mental health and substance use disorders works. Similar programs to INAP currently in practice across the country show that an appropriate combination of treatment and support can

effectively help participants manage their impairment or condition. Participation in a highly structured monitoring program provides frequent and stringent review of contract conditions, along with immediate identification of non-compliance. This can help decrease the risk of relapses and increase the likelihood of long term recovery (Darbo, 2011).

Program Overview

How the INAP Process Works

Nurses may access the program by making a self-report, the Board may refer them, or another person such as an employer, co-worker or family member may also refer them. This may result in referral for further evaluation and treatment. The INAP committee may then determine whether or not the nurse would benefit from ongoing support and monitoring. If they determine so, an individualized contract is developed that is designed to allow the nurse to continue or return to practice with reasonable skill and safety.

The “Enhanced” Nurse Licensure Compact

At the time of receipt of this newsletter, the 2017 Legislative Session will be underway. Nurses are encouraged to contact their legislators to support the passage of the “Enhanced” Nurse Licensure Compact.

The following article is a combination of the three previous articles published in the *Nursing Newsletter* regarding the “Enhanced” Nurse Licensure Compact. Share this information with your legislators, employers and fellow nurses. Become involved and spread the word. Iowa has been part of the present compact for 16 years and for continued mobility of nurses and adequate access to care of our patients, Iowa needs to adopt the “Enhanced” NLC to continue what we started in the year 2000.

Background information:

On July 17, 1998, the Iowa Board of Nursing voted to initiate compact legislation. By the year 2000, the law, Iowa Code, chapter 152E, included language on the Nurse Licensure Compact and rules, 655IAC, chapter 16 were in effect.

The Nurse Licensure Compact (NLC) is an interstate compact. It allows a nurse to have one multistate license in their primary state of residency. This permits the nurse to practice in other member states both physically and electronically subject to each state’s practice laws. So what is an interstate compact? An interstate compact is a statutory agreement between two or more states (party states) established for the purpose of solving a particular issue or multi-state concern.

To think of this in simple terms, the NLC is modeled after the driver’s license compact. Each of us are allowed to drive in another state with a license from the state we reside in, though we follow the rules and regulations of the state we are traveling in.

Currently there are 25 states which are members of the NLC. Within these 25 states the belief is that the practice of nursing takes place in the state where the

INAP continued from page 1

Eligibility Criteria

To be considered for INAP, participants need to meet eligibility criteria. A nurse may be eligible for the alternative program if the following apply:

- Has a physical or mental condition affecting their nursing practice
- Use alcohol or drugs to the extent their nursing practice is affected

Nurses must agree to:

- Voluntarily enter the program
- Comply with all terms in their legally binding contract or they may be terminated from INAP

Ineligibility Criteria

Not everyone with a mental or physical condition or substance use disorder is an appropriate candidate for entry into INAP. Some may be referred to the enforcement unit of the Board for further investigation. A nurse may be *ineligible* for the alternative program if they:

- Diverted drugs for distribution to third parties for personal profit
- Adulterated, misbranded, or otherwise tampered with drugs intended for a patient
- Provided inaccurate, misleading, or fraudulent information or fail to fully cooperate
- Participated in the program, or similar program offered by other states without success.

How INAP Benefits Nurses and the Public

Programs like INAP are designed to offer a voluntary, non-punitive opportunity for impaired nurses to begin recovery which benefits both the nurse and the public. Participation in the program is confidential to the public as long as the nurse is in compliance with program requirements and adheres to their individualized contract.

THE IOWA NURSE ASSISTANCE PROGRAM CAN HELP

What?

Who?

Why?

What is the Iowa Nurse Assistance Program (INAP)?

INAP is a new resource for individual nurses who are impaired as a result of alcohol or drug use, dependency, addiction, or by any mental or physical condition.

It is a voluntary, confidential program and provides an opportunity for licensed professionals to receive proper treatment and maintain their professional status, while protecting the safety of the public.

Are programs like this successful?

Yes! Similar programs to INAP currently in practice show that an appropriate combination of treatment and support effectively help participants manage their impairment or condition.

Who may be eligible for the program?

- Nurses who voluntarily report themselves
- Nurses with any physical or mental condition affecting their practice
- Nurses who use alcohol or drugs to the extent their practice is affected

Referrals may come from:

- Self-referral
- Board referral
- Licensure department
- Enforcement
- Employer complaints

Impairment can cost your job and license.

INAP Serves Nurses:

- Consultation upon entering program
- Early intervention and treatment referrals to local support services
- Ongoing monitoring and support as an effective alternative to discipline

INAP Serves the Public:

- Public protection through close monitoring to ensure safe practice
- Coordination with employers to assure patient safety and a smooth transition back to nursing practice

Who Runs INAP?

The Iowa Nurse Assistance Program (INAP) is authorized by the Iowa Board of Nursing to assist nurses in the early identification and treatment of impairment and illness. INAP is managed by a committee who works with the program coordinator. Committee members include the director of the Iowa Board of Nursing, substance and mental health professionals, nurses recovering from addiction, and a public member.

IOWA NURSE ASSISTANCE PROGRAM

OFFERED BY THE IOWA BOARD OF NURSING

The INAP committee may:

- 1) Evaluate on a case by case basis whether candidates are appropriate for the program.
- 2) Submit recommendations to the Iowa Board of Nursing.
- 3) Monitor the recovery process of participants.

Assuring Safe Nursing Care in Iowa

A confidential monitoring program for nurses in need of assistance

Data About Key Aspects of Substance Use and Mental Health

MENTAL HEALTH AND TREATMENT SERIOUS MENTAL ILLNESS

Past Year Serious Mental Illness (SMI) Among Adults Aged 18 or Older in Iowa and the United States (2010–2011 to 2013–2014)^{1,7}

Iowa's percentage of serious mental illness (SMI) among adults aged 18 or older was similar to the national percentage in 2013–2014.

4.6% In Iowa, about 107,000 adults aged 18 or older (4.6% of all adults) per year in 2013–2014 had SMI within the year prior to being surveyed. The percentage did not change significantly from 2010–2011 to 2013–2014.

Source: SAMHSA, Center for Behavioral Health Statistics and Quality, National Surveys on Drug Use and Health, 2010–2011 to 2013–2014.

Serious mental illness (SMI) is defined by SAMHSA as adults aged 18 or older who currently or at any time in the past year have had a diagnosable mental, behavioral, or emotional disorder (excluding developmental and substance use disorders) of sufficient duration to meet diagnostic criteria specified within the DSM-IV that has resulted in serious functional impairment, which substantially interferes with or limits one or more major life activities.

Graph reflects general population and not just Nursing population.

SUBSTANCE USE ALCOHOL DEPENDENCE OR ABUSE

Past Year Alcohol Dependence or Abuse Among Individuals Aged 12 or Older in Iowa and the United States (2010–2011 to 2013–2014)¹

Iowa's percentage of alcohol dependence or abuse among individuals aged 12 or older was similar to the national percentage in 2013–2014.

6.2% In Iowa, about 160,000 individuals aged 12 or older (6.2% of all individuals in this age group) per year in 2013–2014 were dependent on or abused alcohol within the year prior to being surveyed. The percentage decreased from 2010–2011 to 2013–2014.

Source: SAMHSA, Center for Behavioral Health Statistics and Quality, National Surveys on Drug Use and Health, 2010–2011 to 2013–2014.

Binge alcohol use is defined as drinking five or more drinks on the same occasion (i.e., at the same time or within a couple of hours of each other) on at least 1 day in the past 30 days.

Graph reflects general population and not just Nursing population.

SUBSTANCE USE ILLICIT DRUG DEPENDENCE OR ABUSE

Past Year Illicit Drug Dependence or Abuse Among Individuals Aged 12 or Older in Iowa and the United States (2010–2011 to 2013–2014)¹

Iowa's percentage of illicit drug dependence or abuse among individuals aged 12 or older was similar to the national percentage in 2013–2014.

2.2% In Iowa, about 56,000 individuals aged 12 or older (2.2% of all individuals in this age group) per year in 2013–2014 were dependent on or abused illicit drugs within the year prior to being surveyed. The percentage did not change significantly from 2010–2011 to 2013–2014.

Source: SAMHSA, Center for Behavioral Health Statistics and Quality, National Surveys on Drug Use and Health, 2010–2011 to 2013–2014.

Illicit drugs is defined as marijuana/hashish, cocaine (including crack), inhalants, hallucinogens, heroin, or prescription-type drugs used nonmedically, based on data from original National Survey on Drug Use and Health (NSDUH) questions, not including methamphetamine use items added in 2005 and 2006.

Graph reflects general population and not just Nursing population.

Full Time Registered Nurse Independence (1.0 FTE)

Cedar Valley Hospice staff provides high quality and compassionate end of life care, while focusing on making each moment matter for the patient and family. We are seeking a skilled RN to join our Independence team.

Current Iowa RN licensure required with 2 years RN experience preferred. Current Iowa Driver's license and reliable vehicle required.

Post offer physical, tb and drug screen required.

Interested applicants should apply online at www.cvhospice.org.

Closing Date: 1/15/2017

Nurse Licensure Compact continued from page 1

patient resides. Therefore, if a nurse who resides in Iowa and holds an Iowa license practices in a compact state, such as Missouri, she/he would practice on their multistate license following the rules and regulations of Missouri. This would appear to be a win-win situation for both the nurse and those states which participate in the compact.

The compact allows for portability of the nurse to meet the needs of patients in many states and decreases the potential of more than one licensing fee for the nurse.

So why fix what is not broken? There are many reasons for the "Enhanced" Nurse Licensure Compact as cited below:

1. Though there are 25 states which participate in the compact, there are 25 states which do not. There may be many factors as to why a state is opposed to joining the compact. One factor may be that the requirements for licensure in the compact states are not stringent enough. Currently states which participate in the compact are not required to complete background checks on initial licensure applicants or endorsements. Iowa does require background checks.
2. The Affordable Care Act (ACA) has increased access to care for the nation's growing and aging population, which in turn requires creative modalities in the delivery of healthcare.
3. The United States Congress is having national licensure discussions which would remove each state's individual rights for licensing and governing nurses in their respective states.
4. Other health care professions are developing interstate licensure compacts (i.e. medicine, physical therapy, EMS, psychology).
5. Telehealth services are increasingly being utilized. Telehealth delivery has no geographic boundaries. A nurse or an advanced practice nurse may be practicing in a clinic in Iowa and she/he has patients all over the country who she/he communicates with via technology. Again, if the belief is that the practice of nursing is where the patient is, this nurse would require several licenses in those

states which are not part of the compact. The need for facilitating interstate nursing practice continues to grow.

Therefore in 2013 through 2015, members of the National Council of State Boards of Nursing (NCSBN) met several times to redraft a new compact. The "Enhanced" Nurse Licensure Compact was approved by the membership in May of 2015. The NCSBN also approved a new Advanced Practice Registered Nurse Compact.

As a brief reminder the National Council of State Boards of Nursing (NCSBN) is an independent, not-for-profit association comprised of boards of nursing from the U.S. and around the world. NCSBN is the leading source of data, information and research regarding nursing regulation and related issue. The mission of the NCSBN is to provide education, service, and research through collaboration leadership to promote evidence – based regulatory excellence for patient safety and public protection.

By now you are hopefully asking yourself what are the benefits of the "Enhanced" Nurse Licensure Compact. The following will help to answer your questions:

1. A nurse has the ability to practice in multiple states with one license.
2. The compact reduces regulatory requirements by removing the necessity for obtaining a license in each state.
3. The compact clarifies a nurse's authority to practice in multiple states via telehealth, which in turn increases patient access to care and provides continuity of care.
4. The compact provides member states with the authority to facilitate a discipline case across state lines.
5. The compact gives nursing boards the ability to share complaint and investigative information throughout the investigative process and there is a shared responsibility for patient safety not governed by geographical boundaries. There is a commitment to the protection of the public.
6. The compact provides for uniform law, rules and policies applicable and is enforceable to all compact states.

Not to confuse the issue, Iowa is presently one of the 25 states which are part of the current Nurse Licensure Compact, but as the "Enhanced" Nurse Licensure Compact becomes adopted by states the need for Iowa to adopt the new compact will become vital.

Uniform Licensure Requirements:

One of the driving forces to adopt the "Enhanced" NLC is that all states joining the compact will require uniform licensure requirements. This is one of the following elements which reinforces the fact that the "Enhanced" NLC is safe and efficient:

1. The current NLC had been operational and successful for more than 15 years.
2. All the safeguards that are built into the current state licensing process are required before a nurse is issued a multistate license.
3. The "Enhanced" NLC has uniform licensure requirements so that all states can be confident the nurses practicing within the NLC have met a set of minimum requirements, regardless of the home state in which they are licensed.
4. Although less than one (1) percent of U.S. nurses ever require discipline by a board of nursing (BON), in the rare event of any disciplinary issues, swift action can be taken by the BON regardless of the state where the nurse is licensed or practices. If a nurse is disciplined, the information is placed into the national database, NURSUS®

The following are the uniform licensure requirements that a nurse must meet to be issued a multistate license, regardless of their home state:

1. Meet the home state's qualifications.
2. Graduate from a qualifying education program.
3. Passed the NCLEX-RN® or NCLEX-PN® exam (or predecessor exam).
4. Have no active discipline on a license.
5. Submit to a criminal background check and have no prior state or federal felony convictions.
6. Not be currently enrolled in an alternative to discipline program.
7. Have a valid U.S. Social Security number.

Mercy Nurses Rock!

We're looking for awesome nurses to be part of our care team at Mercy-Sioux City! We are growing and we want the best and the brightest to come work with our team of great caregivers and doctors to provide the best care to our patients. There are some exciting times ahead for Mercy-Sioux City and we want you to be a part of it!

Mercy is looking for full and part time Nurses throughout our hospital including ER/Trauma, Surgery, Rehab and our brand-new ICU!

Ask us about our **NEW** Nurse Residency Program.
It's all about your future!

Competitive wages, benefits, and education reimbursement!

Please visit our website at <http://www.mercysiouxcity.com> or apply online at www.mercysiouxcity.com/careers.

EEO Employer F/M/Veteran/Disabled.

Grandfathering Clause:

The “Enhanced” NLC has a grandfathering clause to address nurses who currently hold a multistate license and how the uniform licensing requirements affects their licensure. A nurse holding a home state multistate license on the “Enhanced” compact’s effective date may retain and renew the license provided that:

- A nurse who changes primary state of residence after the “Enhanced” NLC’s effective date must meet requirements to obtain a multistate license from a new home state.
- A nurse who fails to satisfy the requirements due to a disqualifying event occurring after the compact’s effective date is ineligible to retain or renew a multistate license.

Example – Nurse Nancy holds a multistate license in Iowa, her primary state of residence. She moves to Missouri, also a compact state, but she has a history of a felony which would now prohibit her from receiving a multistate license in Missouri. Nurse Nancy may receive a single state license in Missouri if she meets the laws and rules set forth in Missouri for licensure.

Example – Nurse John holds a multistate license in Iowa, his primary state of residence. The Iowa Board of Nursing is informed that Nurse John has been convicted of a felony. He would no longer be eligible for a multistate license.

Adoption of the Compact:

As of this publication the “Enhanced” compact is on the move nationally and has been adopted in the following states: Arizona, Florida, Idaho, Missouri, New Hampshire, Oklahoma, South Dakota, Tennessee, Virginia and Wyoming.

The Iowa Board of Nursing will introduce legislation to adopt the “Enhanced” Nurse Licensure Compact in the 2017 Legislative Session.

The effective date of the “Enhanced” NLC legislation is determined by either 26 states joining the compact or by the date December 31, 2018.

- Example 1: If 26 states join by January 1, 2017, the “Enhanced” NLC becomes effective.
- Example 2: If only 20 states have joined by December 31, 2018, the “Enhanced” NLC still becomes effective.

As a reminder here is important information you should know as Iowa moves forward with the “Enhanced” Nurse Licensure Compact:

1. Iowa is one of 25 states currently a member of the Nurse Licensure Compact (NLC).
2. The NLC has been operational for over 15 years.
3. The “Enhanced” NLC is an updated version of the current Nurse Licensure Compact with the goal to have all 50 states become members.
4. Key elements of the “Enhanced” NLC:
 - a. Provides for uniform licensure requirements for all states.
 - b. The practice of nursing takes place in the state where the patient resides.
 - c. Nurses have the ability to practice in multiple states with one license.
 - d. Reduces regulatory requirements by eliminating the necessity to obtain a license in each state.
 - e. Increases access to care while maintaining public protection.
 - f. Clarifies a nurse’s authority to practice in multiple states via telehealth.
 - g. Allows nurses to quickly cross state borders and provide vital services in the event of a disaster.

- h. Removes burdensome expense for both the nurse and the organizations that employ them.
- i. Provides member states the authority to facilitate a discipline case across state line.

Visit our website, <https://nursing.iowa.gov> and NCSBN’s website, www.nursecompact.com to learn more about the “Enhanced” Nurse Licensure Compact.

Keep the momentum going and support the “Enhanced” Nurse Licensure Compact for Iowa.

Dreaming of a rewarding and more focused career?

Understanding the Relationship Between the APRN Consensus Model and the APRN Compact

The Advanced Practice Registered Nurse (APRN) Consensus Model was developed in 2008 to provide clarity and uniformity among states for the APRN role, population foci, specialty areas, scope of practice and educational requirements.

The Consensus Model is a result of the collaborative work of the APRN Consensus Work Group and National Council of State Boards of Nursing APRN Advisory Committee with extensive input from the APRN stakeholder community.

For states to adopt the APRN Compact they must comply with the key provisions of the APRN Consensus Model. Currently Iowa does not meet the majority of the key provisions to move forward with the adoption of the APRN Compact.

To be in full compliance of the APRN Consensus Model Iowa must change the title from Advanced Registered Nurse practitioner (ARNP) to Advanced Practice Registered Nurse (APRN) and do so legislatively. At this point in time the current title ARNP will not prevent Iowa from moving forward with the APRN Compact, primarily because 10 states must legislatively adopt the APRN Compact for it to be implemented. Currently, two states, Idaho and Wyoming have adopted the APRN Compact and it is estimated that three to four states will adopt the APRN Compact yearly until 10 states have joined.

Therefore, Iowa has time to make the title change with the support of all four advanced practice roles.

The following are the foundational requirements for licensure by Boards of Nursing to be congruent with the APRN Consensus Model as identified in the APRN Joint Dialogue Group Report, July 7, 2008.

Boards of Nursing will:

1. license APRNs in the categories of Certified Registered Nurse Anesthetist (CRNA), Certified Nurse-Midwife (CNM), Clinical Nurse Specialist (CNS) or Certified Nurse Practitioner (CNP) within a specific population focus;
2. be solely responsible for licensing Advanced Practice Registered Nurses;
3. only license graduates of accredited graduate programs that prepare graduates with the APRN core, role and population competencies ;
4. require successful completion of a national certification examination that assesses APRN core, role and population competencies for APRN licensure;
5. not issue a temporary license;
6. only license an APRN when education and certification are congruent;
7. license APRNs as independent practitioners with

no regulatory requirements for collaboration, direction or supervision;

8. allow for mutual recognition of advanced practice registered nursing through the APRN Compact;
9. have at least one APRN representative position on the board and utilize an APRN advisory committee that includes representatives of all four APRN roles; and,
10. institute a grandfathering clause that will exempt those APRNs already practicing in the state from new eligibility requirements.

The Iowa Board of Nursing is in the process of reviewing and revising 655 Iowa Administrative Code, Chapter 7, Advanced Registered Nurse Practitioners, to be consistent with the Consensus Model. The rules will define the roles, population foci, educational and licensing requirements, and scope of practice for the advanced practice nurse.

A grandfathering clause will be in place for currently practicing ARNPs once the state adopts the Consensus Model in its entirety. The ARNP will be permitted to practice as long as they retain their licensure and certification.

Refer to the diagram which outlines the four roles, current population foci for each role and the core educational requirements.

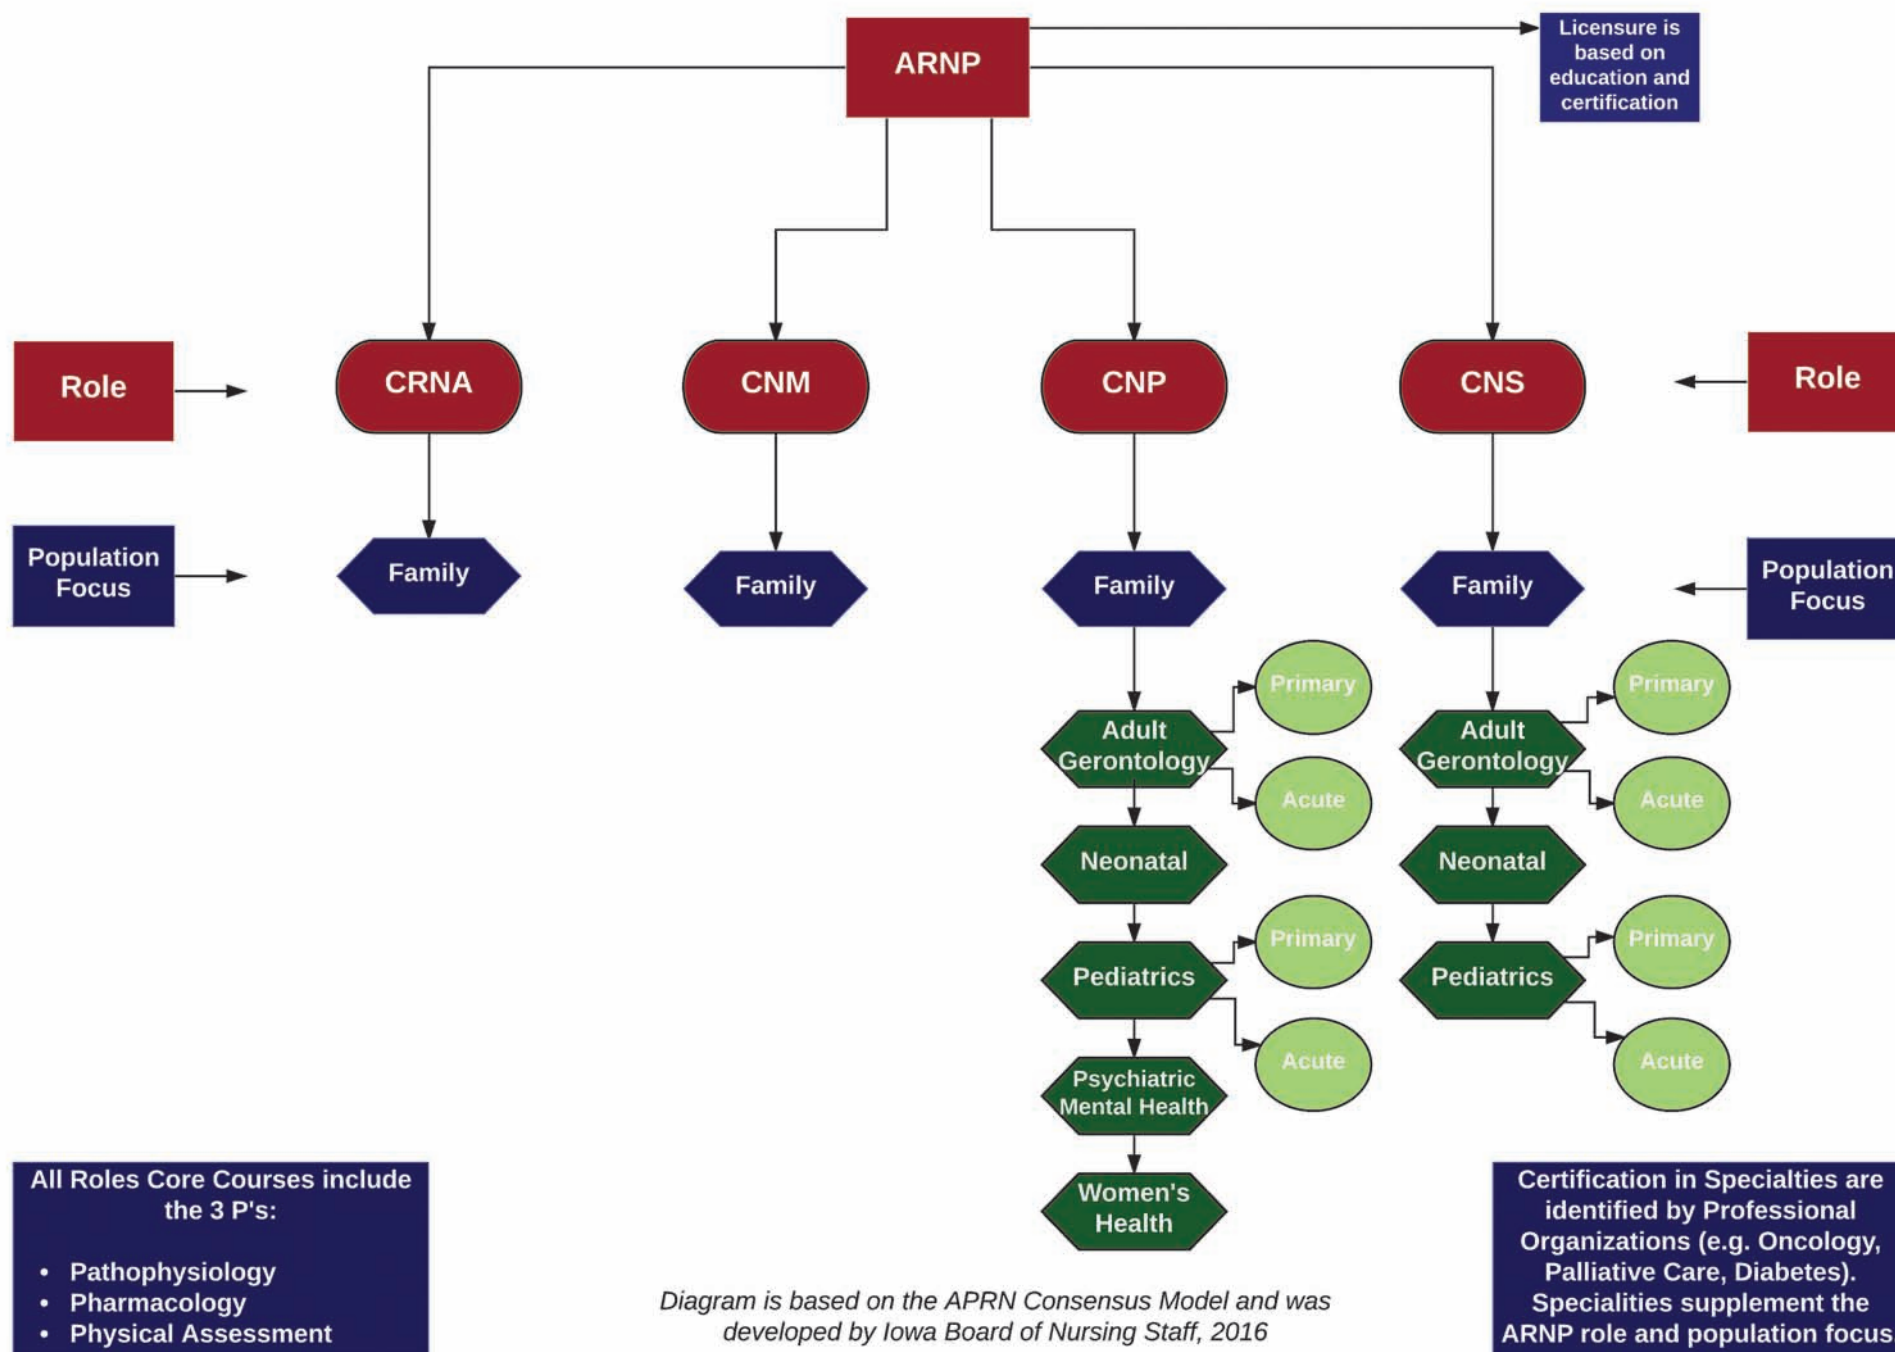

Diagram is based on the APRN Consensus Model and was developed by Iowa Board of Nursing Staff, 2016

GREEN HILLS™ Retirement Community **Charge Nurse Position**

Green Hills Retirement Community, an upscale retirement community, is currently seeking individuals for **CHARGE NURSE**

Additional information and applications can be found on our web-site. Negative pre-employment drug screen and criminal background check required.

Green Hills Retirement Community
2200 Hamilton Drive, Ames, Iowa 50014

APRN Compact Moving Forward

At the time of receipt of this newsletter, the 2017 Legislative Session will be underway. Nurses are encouraged to contact their legislators to support the passage of the APRN Compact.

Currently Iowa does not recognize the title Advanced Practice Registered Nurse (APRN), but for purposes of this document regarding the APRN Compact the title APRN will be used throughout this article.

In 2002, the first APRN Compact was adopted by three states (Texas, Utah and Iowa). However, this version of the APRN Compact was not implemented, partially due to the lack of uniformity of APRN licensure requirements between states. Following the adoption of the APRN Consensus Model in 2008, the three compact states identified an opportunity to address the lack of uniformity and create a new version of the compact which incorporated the APRN Consensus Model. The APRN Consensus Model provides clarity and uniformity for the APRN role, population foci, specialty areas, scope of practice, and educational requirements.

In 2011, the APRN Compact Work Group formed and drafted the new APRN Compact. The APRN Compact was approved by the National Council of State Boards of Nursing's (NCSBN) membership in May of 2015.

The following statements are common to both the "Enhanced" Nurse Licensure Compact and the APRN Compact:

1. Uniform licensure requirements (ULRs) for all states.
2. The practice of nursing takes place in the state where the patient resides.
3. Nurses have ability to practice in multiple states with one license.
4. The Compact will:
 - a. Reduce regulatory requirements by eliminating the necessity to obtain a license in each state.
 - b. Increase access to care while maintaining public protection.
 - c. Clarify a nurse's authority to practice in multiple states via telehealth.
 - d. Allow nurses to quickly cross state borders and provide vital services in the event of a disaster.
 - e. Remove burdensome expenses for both nurses and the organizations that employ them.
 - f. Provide member states the authority to facilitate a discipline case across state lines.

The general provisions specific to the APRN Compact as summarized by the NCSBN, are listed below:

1. A member state must implement procedures for considering the state and federal criminal history records of applicants for initial APRN licensure or APRN licensure by endorsement.
2. The APRN ULRs adopted by the Commission provide the minimum requirements for APRN multistate licensure.
3. To obtain/retain a multistate license, an APRN must meet the home state's qualifications, in addition to the ULRs.

4. The Commission identifies in rule the approved APRN role and population foci for licensure. An APRN shall be licensed in an approved APRN role and at least one approved population focus.
5. An APRN multistate license is recognized as authorizing the APRN to practice in each party state under a multistate license privilege, in the same role and population focus as in the home state.
6. An APRN multistate license shall include prescriptive authority for non-controlled prescription drugs. An APRN shall satisfy all requirements imposed by the state for each state in which an APRN seeks authority to prescribe controlled substances.
7. An APRN multistate license holder is authorized to practice independent of a supervisory or collaborative relationship with a physician.
8. Authority to take adverse action against a multistate licensure privilege with application of state due process laws.
9. Nurse compliance with state practice laws.

To clarify the "Interstate Commission" is the governing body of the APRN Compact. This term is commonly used by other Interstate Compact governing bodies. The Commission will have the authority for rulemaking. The rules will specifically outline the ULRs and address the key components of the Consensus Model.

To be adopted, the APRN Compact will require legislative action. It is the intent of the Iowa Board of Nursing to introduce APRN Compact language for the 2017 legislative session. The APRN Compact will be implemented once 10 states have adopted the Compact. Idaho and Wyoming adopted the APRN Compact in 2016.

Visit our website, <https://nursing.iowa.gov> and NCSBN's website www.aprncompact.com to learn more about the APRN Compact.

Keep the momentum going and support the APRN Compact for Iowa.

CONGRATULATIONS!

SILVER SPRING, MD – The American public has again ranked nurses as the **professionals with the highest honesty and ethical standards**, according to a Gallup poll released December 19. The annual poll marks the 15th consecutive year that nurses have been ranked the most trusted out of a wide spectrum of professions, including medical doctors and police officers.

"Every day, millions of nurses are on the front lines in the fight to improve the health of all Americans," said Pamela F. Cipriano, PhD, RN, NEA-BC, FAAN, president of the American Nurses Association. "Whether nurses are by the bedside or in the board room, **we continue to be a trusted resource and a vital part of our nation's health care system.** This poll reflects the trust the public has in us, and we'll continue to work hard to keep that trust."

According to the poll, **84 percent of Americans rated nurses' honesty and ethical standards as "very high" or "high."** The next closest profession, pharmacists, was rated 17 percentage points behind nursing.

"Trust plays an important role in the relationship between nurses and the patients we serve," said Cipriano. "ANA encourages nurses to draw on that trust to engage with consumers to improve their health and to advocate for patients and for the quality of care in this country. Additionally, I challenge those charged with making health policy at the facility, local, state and national levels, to include the trusted voice of nurses at the decision-making table. Based on this survey, **no other profession is held in as high regard by the public.** And given nursing's frontline perspective on health care delivery, we offer a point of view that is unmatched."

In 2017, ANA will continue its longstanding efforts to advocate for health system reform. The association is committed to working with the new administration and Congress to advance policy that aligns with its four principles for health system reform: **access to care, affordable and equitable care, quality of care and workforce.**

Practice Corner

The Evolving Role of Telehealth and Telemedicine and the Practice of Nursing in Iowa

Jimmy A. Reyes, DNP, AGNP, RN
Associate Director of Practice and Education

The Iowa Board of Nursing receives many inquiries about the use of telehealth and telemedicine technology and services to deliver nursing care in the state of Iowa and across state lines. The definition of telehealth and telemedicine varies by state, regulatory agencies, and healthcare organizations. For purposes of this article, the definition provided by the American Telemedicine Association (ATA) will be used. According to the ATA (2006), “telemedicine is the use of electronic communications and information technologies to provide clinical services when participants are at different locations” (p.3). Concurrently, telehealth comprises of a broader application of technologies and scope of healthcare services, including distance education. The applications and technology used include, but is not limited to, two-way video, smart phones, e-mail, wireless tools, and other forms of telecommunications technology (ATA, 2006; NCSBN, 2014). Fused with a body of knowledge, competency, and expertise utilized to provide nursing care over distance, telehealth nurses and advanced registered nurse practitioners (ARNP) may effectively care for patients remotely (ATA, 2011).

According to the American Hospital Association (2015), there are three main modalities, each with their respective applications within the broader context of telehealth. First, real-time, a live, two-way interface between a patient and a healthcare provider uses audiovisual technology. Second, store-forward, comprises of transmission of a patient’s documented health history (i.e. prerecorded

videos) via a secure electronic communications system to a provider, generally a specialist. Third, remote patient monitoring encompasses the collection of patient data via electronic communications (i.e. EKGs). This is particularly helpful when tracking data after a patient has been discharged. Consequently, the facility or agency shall have specific policies and procedures for the delivery and implementation of the aforementioned modalities.

When the registered nurse or ARNP uses electronic modalities to gather information from a patient and gives advice based on assessment of the patient, that is the practice of nursing and provision of patient care. The Board has determined that the practice of nursing is where the patient resides at the time care is provided. When a patient resides in Iowa, the registered nurse or ARNP must hold a current Iowa license and practice within the guidelines of the Iowa Administrative Code (The Iowa Legislature, 2015). If the patient resides outside of Iowa and from a state that is a member of the Nurse Licensure Compact, the nurse or ARNP shall hold a current Iowa license. If the nurse or ARNP is providing nursing care in a non-compact state, the Board suggests the provider contact the agency which regulates nursing in that jurisdiction to determine the license needed to practice in that state. An individual engaged in telehealth and/or telemedicine without an appropriate license or unauthorized to practice nursing in the state of Iowa may be subject to disciplinary action.

Technology is a modality that may continue to change the way registered nurses and advanced registered nurse practitioners practice. The standard of care now includes telemedicine and telehealth to improve access, quality, and patient outcomes (Henderson et al., 2015; IOM, 2012).

As indicated by the National Council of State Boards of Nursing, the delivery of nursing services via telehealth and telemedicine constitutes the practice of nursing and registered nurses and ARNPs should be knowledgeable concerning their scope of practice, legal, regulatory, and ethical guidelines when using this technology.

Fluoroscopy Audit Reminder

The administrative rules governing nursing in Iowa require Advanced Registered Nurse Practitioners (ARNPs) who supervise the use of fluoroscopic x-ray equipment to have the appropriate education and continued annual radiological safety updates. Pursuant to 7.2(d), the initial and annual education requirements are subject to audit by the Board. Therefore, the Board of Nursing will be auditing ARNP's who supervise fluoroscopy.

The initiation of the audit process began January 12, 2015. The process is as follows:

- On the ARNP online and paper renewal application a question will be asked if the practitioner provides direct supervision in the use of fluoroscopy. The renewal process is every three years,
- If the practitioner answers yes, they will be required to provide verification of completion of the initial course and yearly safety courses, along with a **copy of the course description and learning outcomes (it is important to submit the specific course description and learning outcomes and not just the course title)**,
- Board staff will contact the practitioner if there are any questions about the submitted course work or if the practitioner has not completed their required education,
- At any point in time that board staff identifies the ARNP is not complying with the course requirements and the audit process the information will be submitted to the Enforcement Unit.

The Iowa Board of Nursing recognizes this is a new process for all ARNP's supervising the use of fluoroscopic x-ray equipment. Board staff is committed to assist practitioners in the audit process. Please contact Dr. Jimmy Reyes, Associate Director of Practice/Education with questions and concerns, Jimmy.Reyes@iowa.gov

Agendas and Minutes On the Web

All Board and Committee agendas are on our web-site. Agendas are posted at least 24 hours in advance of a meeting. Previous agendas will remain posted until replaced by the current agendas. Board and Committee minutes are posted at our website approximately three (3) months following the meetings.

You can locate our Agendas and Minutes at our website, nursing.iowa.gov, under "About the Board."

You may subscribe to email notification of the first posting of a meeting or conference call agenda by sending a blank email to: join-IBON_AGENDAS@lists.ia.gov

Creating an Online User Account

If you have ever done business online with any state agency (such as for college aid), you would use the same account id that you have already created. Otherwise, all license related processes begin with user registration, including updating contact, employment or educational information. Secured Access and ordering a roster also require the visitor to register.

The main menu displays the following option:

If you click on "Create a New Account," you will be taken directly to the registration page and tab that you need in order to register:

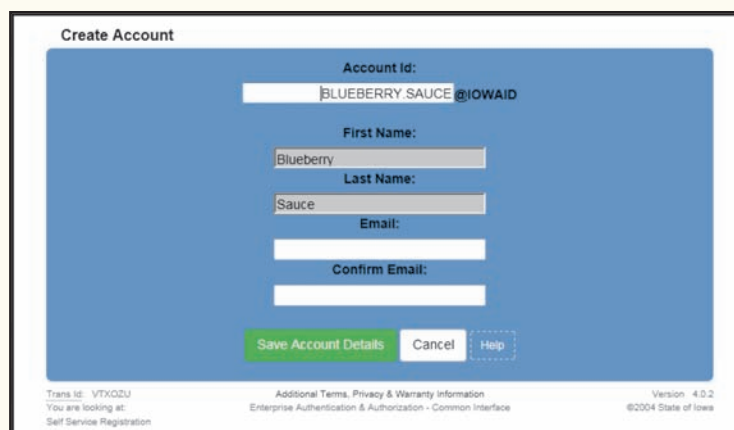

This registration site is maintained by the state's technology division as a global login for the entire state enterprise.

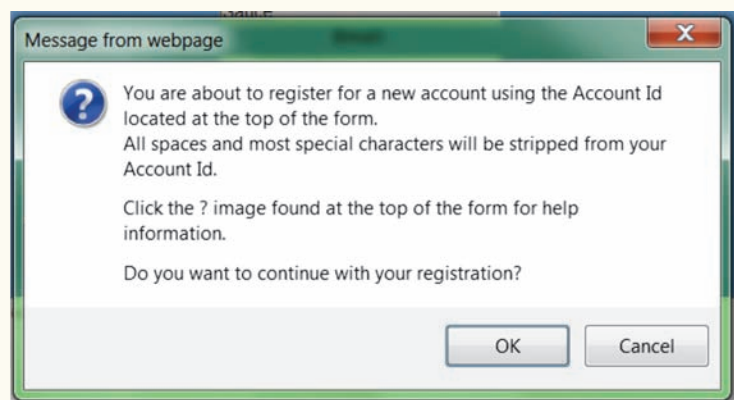

Enter your first and last name:

The registration automatically combines first and last names into a suggested user i.d., and appends "@iowaid." But if the first name/last name combination already exists, the i.d. field will appear blank, and you will need to create your own account i.d. In either case, anything can be substituted ahead of the "@", but the i.d. that is created is permanent so it will need to be memorable.

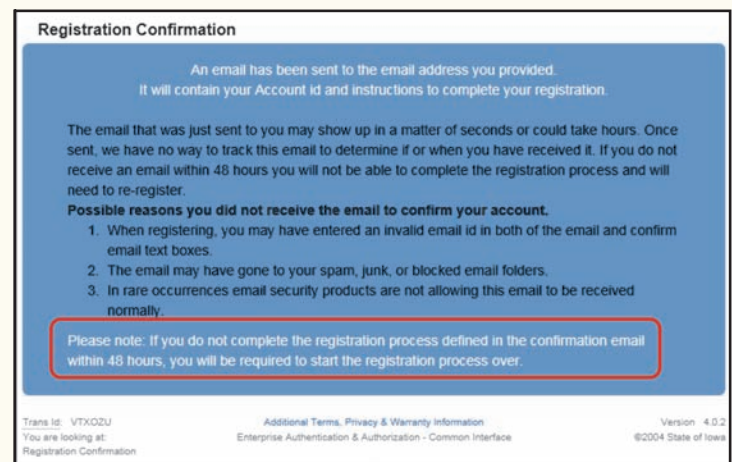

Enter your email address twice in the screen pictured above, and click "Save Account Details." A popup box gives a final caution.

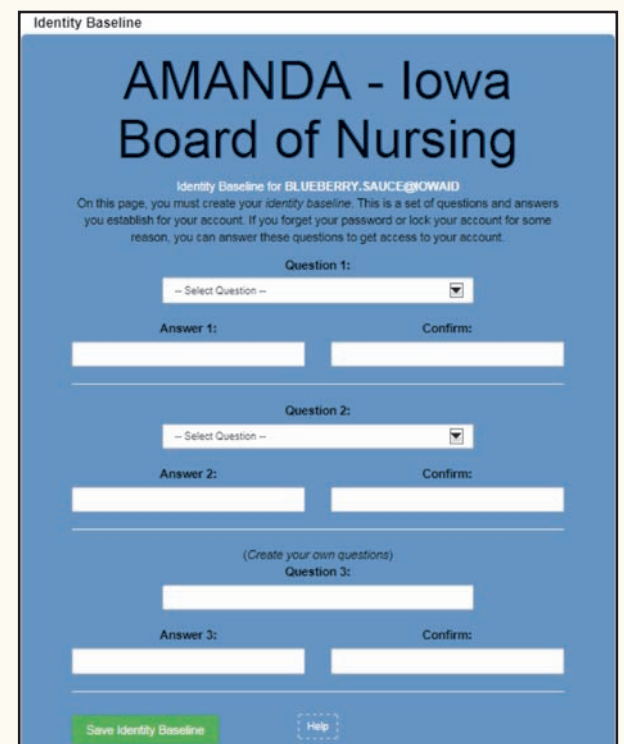

If you created an i.d. with your first name.lastname as your i.d., and someone else with the same first and last name has already registered to do any kind of business with the State of Iowa, you will receive the following error message.

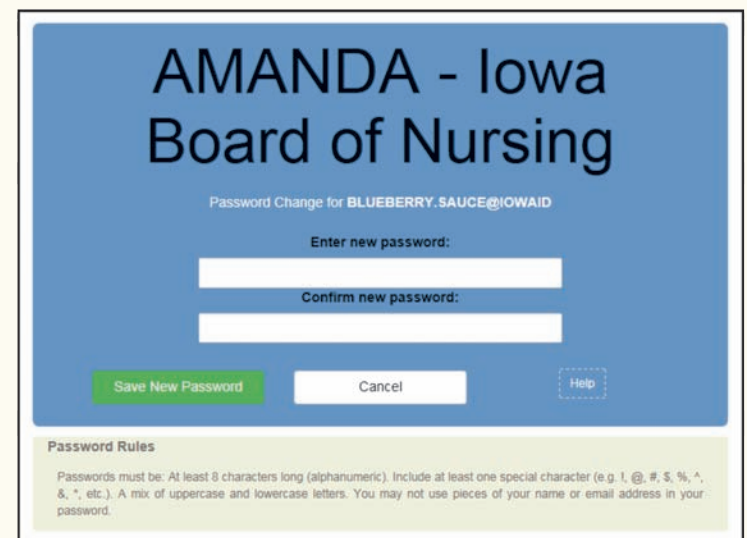

After successfully selecting an i.d., entering the email address twice and clicking "continue," you will see the following screen advising you that an email has been sent with information to complete the registration. Note that there is a time limit of 48 hours to complete the registration.

The email will include a link to come back to the registration site. This is done as verification that the email address is a real one. Clicking the link in the email returns the user to the following screen at the EAA website to complete the registration by selecting security questions and answers.

The next screen requires the user to create their password:

The registration is complete, and the user is taken to the screen where they can actually log in. Note that the above registration process should only be required once. Thereafter, the licensee would use the existing account.

Also note that on most screens there is a "Help" button. This will take you to a help library maintained by the state's Office of the Chief Information Officer (OCIO), and may take you to the relevant portion of an extended FAQ system.

It is only on the login screen itself, that you will find a link to report an issue to the OCIO Help Desk.

This link will take you into the state's OCIO site to submit a service request or inquiry.

TO CHANGE YOUR EMAIL ADDRESS

If your email address changes, it needs to be updated in two different places: your IBON record, and your login account. These are hosted separately.

To update your IBON record:

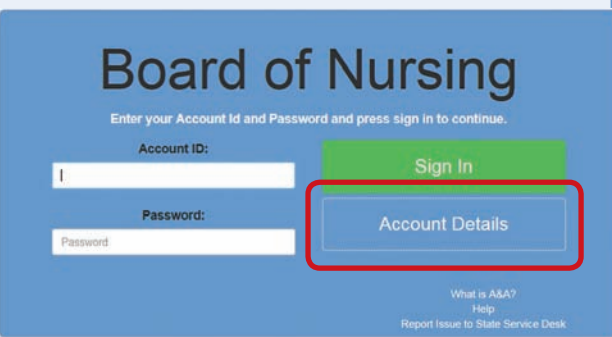

Although you can wait until you renew your license, it may be wiser to update it immediately, as follows:

1. Go to IBON Online Services and select "Update Contact Information."
2. This will take you to the Enterprise login screen mandated by the State of Iowa.
3. Enter your account i.d. and password, and click "Sign In."
4. You will be returned to the Iowa Board of Nursing Online Services, and the proper screen to update your information.
5. Update all available fields on the screen – including your email address, and click Continue.

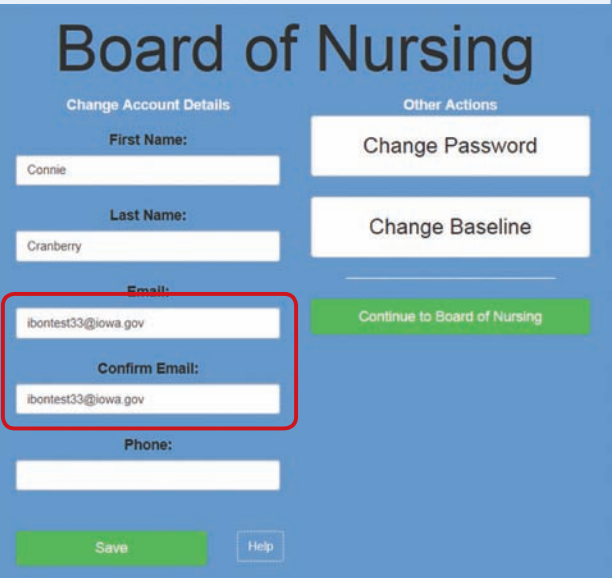

To Update your login i.d.

Your login email is different from the email address in your license record. The login email is used by the state's mandated authentication services for all state business. If you forget your login i.d, the system can send it to you – but it will go to the email address they have on record in the login account, not to the address in your license record.

1. Go to IBON Online Services and select "Update Contact Information." This will take you to the Enterprise login screen mandated by the State of Iowa.
2. On the login screen (below), enter your account i.d. and password, **BUT instead of clicking on "Sign In," click on "Account Details."**

3. This will take you to the following screen, where it is apparent that you need to enter your new email twice and click save.

Additional note:

If you can remember neither your login i.d. nor your password, AND your email address has changed, you have two choices:

1. Create a new and different login i.d. and password. The new login i.d. must be different from the one you initially created, i.e., Suzy.Smith@iowaid could become Suzy.Smith2@iowaid.
2. You can request assistance through the state's Help Desk from the links available in the lower right of the login screen, or by calling 515-281-5703, or 1-800-532-1174.

Renewal Reminder

Licenses should plan to renew their nursing license 30 to 60 days prior the expiration date. A nursing license may be renewed until midnight of the expiration date without penalty, but this practice is discouraged. Online system problems can occur and late fees will be assessed for any renewal completed after midnight of the expiration date.

EXPIRATION DATE	RENEWAL DATES	LATE FEE ASSESSED	INACTIVE STATUS (if not renewed)
January 15, 2017	November 15, 2016 – January 15, 2017	January 16	February 16, 2017
February 15, 2017	December 15, 2016 – February 15, 2017	February 16	March 16, 2017
March 15, 2017	January 15, 2017 – March 15, 2017	March 16	April 16, 2017
April 15, 2017	February 15, 2017 – April 15, 2017	April 16	May 16, 2017

A \$50 late fee is required for licensees who renew within the 30 days after the license lapses. Licenses that are not renewed will automatically be placed on inactive status on the 16th of the month following the expiration date of the license.

The continuing education requirement for license renewal is 36 contact hours (3.6 CEUs) for the renewal of a full three year license. Licensees renewing for the first time after the license was originally issued, or for the first time after a reactivation, will need 24 contact hours (2.4 CEUs) completed after the effective date printed on the license wallet card. Before you renew, you should have your documentation in-hand to confirm you have what you need. As soon as you renew, you will know if you have been chosen for audit. Remember, if it is not documented – it is not done!

Change of Address/Name

State law requires you to keep the Board of Nursing apprised at all times of your current mailing address. Notification of NAME changes must be made in writing. For your convenience, you may utilize the following form to submit your address/name change, within 30 days of the change.

Last Name: _____ SSN: _____ / _____ / _____

RN/LPN Medical Specialist

BioLife Plasma Services, a subsidiary of Shire, is an industry leader in operating high quality plasmapheresis centers throughout the US.

We currently have full-time RN or LPN Medical Specialist positions available at our **Coralville** and **Ankeny** facilities.

Be a key player on our team by determining donor suitability, managing adverse events and donor deferrals, and reviewing unsuitable test results. You will also support special donor immunization programs, where applicable. You must be a graduate of a recognized educational program and currently licensed or certified in the state of Iowa.

Current CPR certification is also a must.

Open and flexible availability during facility operating hours is highly preferred. Learn more about the individual operating hours of each facility at : www.biolifeplasma.com

As a global leader dedicated to building the best team in healthcare, we offer competitive compensation and full benefits. We invite you to join our team and share in our success. For additional information on BioLife Plasma Services, and to apply for this position, please visit our career website at: www.biolifeplasma.com/about-biolife/careers

Equal Opportunity Employer

**Improving Lives.
Improving life for everyone.**

IOWA CENTER FOR NURSING WORKFORCE

Goals for the Iowa Center for Nursing Workforce include providing statistical data to inform the public and employers about supply data regarding Iowa's licensed nurses. The following information, taken from the Iowa Board of Nursing's 2016 Annual Report, provides a snapshot of the active nursing workforce demographics in Iowa. The employment setting and education levels of nurses are gathered through the licensure process, every three years. Therefore, the information is accurate at the point a license is renewed.

Figure 21 provides the employment statistics of RNs and LPNs licensed in Iowa from FY 2012 through FY 2016.

Figure 21: Employed Statistics of Nurses Licensed in Iowa (RNs and LPNs), FY 2012-2016

An Address Confidentiality Program
Helping Victims Become Survivors

Safe at Home Overview

Safe at Home is an address confidentiality program for survivors of violent crimes, such as domestic abuse, sexual assault, trafficking, and stalking. Safe at Home provides a designated address, mail forwarding, confidential voter registration and absentee voting.

“Safe at Home can save lives. If we save just one life, this program is worth it. Victims will have a much easier time escaping their abusers. This might be the break they need to start rebuilding their lives. Safe at Home helps victims become survivors.” - Iowa Secretary of State Paul Pate

Designated Address

The designated address is assigned to the participant by the Iowa Secretary of State's Office, and is a Des Moines address. This designated address **must** be accepted where an address is required, both in government agencies and private organizations, by law. All participants are given the same address, with the only distinguishing factor being an apartment number that is assigned to each household.

Mail Forwarding Service

All mail to the participant should be sent to the designated Safe at Home address. This mail will come through the Secretary of State's Office, sorted for each participant and forwarded to their actual address. This will cause a minor delay of approximately 5-7 business days. Please take this in to consideration when sending mail to participants. Safe at Home forwards first-class mail, prescriptions, and government packages to participants.

Verifying Participation

A participant's address is confidential. However, their participation within the program is not. When using the Safe at Home address participants should present a participation card, and you may ask if they are a participant in the program. If at any time you wish to verify a person is a member of the program you can call our office, and we will verify the person's participation in the program, as well as answer general questions regarding the program.

Verifying District

When a participant comes to your location, you may need verification that they live in a specific district. This request needs to be in writing on an official letterhead and either e-mailed or mailed to our office. Once we receive it in our office we will call and confirm verbally whether the participant lives in your district or not.
Note: If your client is waiting for the verification please call after e-mailing the request so we can verify ASAP.

For More Information

Visit our website at <http://safeathome.iowa.gov/> for FAQs, brochures, and more information. For Questions or concerns please contact: Melanie Shellenberger, Program Administrator at 515-725-SAFE (7233) or SafeAtHome@iowa.gov.

SERVICE · PARTICIPATION · INTEGRITY

Nurses, if you are taking part in the Safe at Home initiative, it is your responsibility to provide the Board of Nursing with your Safe at Home address.

MARENGO MEMORIAL HOSPITAL

Neighbors Caring for Neighbors

An Affiliate of UnityPoint Health

We are looking for new or experienced RNs to join our team who possess a positive attitude, a passion for rural healthcare and a commitment to "community."

\$300 Billion Burden: How Can Employers Reduce Tobacco Threat to Workplace Health?

Did you know that smoking costs the U.S. economy \$300 billion annually in direct medical costs and lost productivity? Almost 20 percent of the nation's workforce smokes, which not only threatens employees' health and well-being, but also decreases productivity, increases absenteeism and increases workplace maintenance costs. Cigarette smoking remains the leading cause of preventable disease, disability and death in the United States.

These statistics highlight the serious challenges businesses face:

- 1 in 5 U.S. workers is exposed to secondhand smoke in the workplace.
- Smokers are estimated to cost employers nearly \$6,000 more per year than nonsmokers.
- Worksites that allow smoking spend about \$728 more per 1,000 square feet annually in maintenance costs for office space than smokefree worksites. With U.S. commercial buildings averaging between 12,000 and 19,000 square feet, that is an estimated extra cost of about \$8,736 to \$13,832 annually.

of America and the world. See this site: <http://www.cdcfoundation.org/businesspulse/tobacco-use>. The electronic issue of Business Pulse includes an interactive infographic as well as online CDC resources. Also included is a question and answer feature with Corinne Graffunder, Dr.P.H., M.P.H., director of CDC's Office on Smoking and Health. (Reprinted with permission 12/1/2016)

Editor's Note: Nurses are uniquely positioned to help reduce the threat of smoking to our businesses and population health. Take advantage of the CDC Business Pulse information to see how you can participate in this initiative at your workplace.

Business Pulse: Tobacco Use was launched October 26, 2016, by the CDC Foundation, a nonprofit entity that advances the mission of CDC through public-private partnerships that protect the health, safety and security

Be comfortable at work!
The perfect scrub pant for those who live in yoga pants.

MC²
BY MED COUTURE®

Yoga scrub pants by MC² are so comfortable you'll need a pair for home and for work. They have the same EZ-FLEX fabric you've come to love from the rest of Med Couture's line, with the added comfort of a knit waistband. Front side pockets, double cargo pockets and an extra accessory pocket mean these pants aren't just stylish, they're highly functional.

Try a pair today!

EASTERN IOWA COMMUNITY COLLEGES CLINTON ♦ MUSCATINE ♦ SCOTT

Available Full Time Nursing Faculty Positions

Eastern Iowa Community Colleges (SCC campus) is seeking **Full Time Nursing Instructors** who are committed to diversity, inclusion, and innovation. We are in search of educators who are passionate about helping students to achieve educational, professional, and personal goals through basic skills education, workforce development and training, and transfer-level education. **Under the direction of the Dean of Nursing this position will be responsible for:**

- Providing educational instruction in accordance with the strategic priorities of the college, general college guidelines, board policies, and administrative guidelines.
- Teaching courses and assessing learning outcomes may include alternative delivery methods to include technology-based instructional tools, on-line and hybrid environments.
- Will design courses and curricula related to the specific areas of study.
- Responsibilities will include program recruiting, advising students, and facilitating student organizations.

Qualifications will include:

- Master's degree in Nursing required, or shall make annual progress toward the attainment of such degree.
- Two years clinical nursing experience required.
- Must have the ability to work with a diverse student population.
- Must possess and maintain a valid Iowa Registered Nurse license and BCLS certified.
- Successful candidate must possess exceptional communication skills both verbal and written.

Review of applications/resumes will begin immediately and continue until the position is filled. For more information regarding these employment opportunities please visit our website at <http://www.eicc.edu/about-eicc/careers/index.aspx>. **Interested applicants** should submit resume, cover letter and unofficial transcripts to: EICC-HR@eicc.edu or Human Resources Dept., Eastern Iowa Community Colleges, 306 West River Drive, Davenport, Iowa 52801-1221.

It is the policy of Eastern Iowa Community Colleges not to discriminate on the basis of race, color, national origin, sex, disability, age (employment), sexual orientation, gender identity, creed, religion, and actual or potential parental, family or marital status in its programs, activities, or employment practices as required by the Iowa Code §§ 216.6 and 216.9, Titles VI and VII of the Civil Rights Act of 1964 (42 U.S.C. §§ 2000d and 2000e), the Equal Pay Act of 1973 (29 U.S.C. § 206, et seq.), Title IX (Educational Amendments, 20 U.S.C. §§ 1681 – 1688), Section 504 (Rehabilitation Act of 1973, 29 U.S.C. § 794), and Title II of the Americans with Disabilities Act (42 U.S.C. § 12101, et seq.).

If you have questions or complaints related to compliance with this policy, please contact Debora J. Sullivan, Equity Coordinator, 306 W. River Dr., Davenport, Iowa 52801, (563)336-3487, djsullivan@eicc.edu, or the Director of the Office for Civil Rights, U.S. Department of Education, Citigroup Center, 500 W. Madison, Suite 1475, Chicago, IL 60661, phone number 312/730-1560, fax 312/730-1576.

Mercy Medical Center - Des Moines

For nearly 120 years, Mercy has provided the highest quality health care to central Iowans. Our founders, the Sisters of Mercy, believed in caring for anyone who needed it. That dedication is what has helped us build a reputation for offering the highest quality medical services in the area.

Mercy would like to thank our nurses for the excellent work they do to provide exceptional patient care each day.

If you or someone you know would like to be part of an outstanding team of nurses, Mercy currently has both full-time and part-time opportunities available in several nursing areas.

Mercy Medical Center-Des Moines is an Equal Opportunity Employer who values the strength diversity brings to the workplace.

Interested applicants can apply on-line at www.mercydesmoines.org or call (515) 247-3100.

Got a minute? Your new classroom is your phone – and you can earn credits while you learn! This smart phone app allows nurses to select a subject, read approved articles, and answer a question related to the article to progress toward earning contact hours – all through a mobile app on your smartphone. All programs, when completed, will credit the learner with 1 contact hour that can be used towards relicensure or recertification. Over 125 programs are currently available for the learner on topics from Autism Spectrum Disorder to Zika, with new programs being added frequently. This subscription service is \$69 for 1 year of unlimited credits or \$99 for 2 years of unlimited credits. Download the app on Google Play or the Apple iTunes Store to earn your first contact hour FREE! Or visit **myCEHQ.com** for more information on the more than 125 programs available.

- › All classes are taught by nursing professionals
- › 100% online program provides convenience and flexibility
- › No entrance testing required for licensed, active nurses
- › No waitlist and no application fee
- › Campus locations in Cedar Rapids, Cedar Falls, Davenport, Des Moines, and Mason City

The online Bachelor of Science in Nursing—RN-to-BSN program and the online Master of Science in Nursing program at Kaplan University are accredited by the Commission on Collegiate Nursing Education (www.aacn.nche.edu/ccne-accreditation).

For comprehensive consumer information, visit www.kaplan.edu/info. *Completion time based on a full-time student with a prior associate's degree. Programs will take longer for part-time students and students with a prior diploma/certificate to complete. The number of required credits may vary depending on individual state education requirements, which could affect how long it will take to complete the program. †Kaplan University cannot guarantee employment or career advancement. Additional certification or licensing may be required to work in certain fields. Check with your state or local licensing agency for more details.
